Contents Volume 74

Vol. 74. Nos. 1–3

Editorial

Productive systems: Strategy, control, and management
A. Artiba 1

Hierarchical Production Management

A design and application methodology for hierarchical production planning decision support systems in an enterprise integration context
E. Vicens, M.E. Alemany, C. Andrés and J.J. Guarch 5

Multi-site planning: A transshipment problem
A. Guinet 21

An integrated production planning and scheduling system for hybrid flowshop organizations
F. Riane, A. Artiba and S. Iassinovski 33

The finite horizon economic lot sizing problem in job shops: The multiple cycle approach
J. Ouenniche and J.W.M. Bertrand 49

Sequencing and Scheduling

A Petri net model and a general method for on and off-line multi-resource shop floor scheduling with setup times
C. Artigues and F. Roubellat 63

Exact distribution of the makespan in a two machines flow shop with two kinds of jobs
P. Baptiste and C. Jacquemard 77

Optimal solution for a two-product dynamic scheduling problem in a just-in-time environment
L. Benyoucef, Y. Frein and B. Penz 85

A bicriterion approach to deal with a constrained single-objective problem
C. Dhaenens-Flipo 93

On the optimal release time of jobs with random processing times, with extensions to other criteria
S.E. Elmaghraby 103

Production indices obtained by a myopic policy for non-Markovian dynamics
M.-O. Hongler and P. Ciprut 115

Job shop scheduling with alternative process plans
C.S. Thomalla 125

Maintenance, Reliability and Quality

A genetic approach to the scheduling of preventive maintenance tasks on a single product manufacturing production line
G. Cavory, R. Dupas and G. Goncalves 135

PII: S0925-5273(01)00211-0

Optimal control of preventive maintenance schedule and safety stocks in an unreliable manufacturing environment
T. Dohi, H. Okamura and S. Osaki 147

Optimal just-in-time buffer inventory for regular preventive maintenance
M.K. Salameh and R.E. Ghattas 157

Buffer allocation and required availability in a transfer line with unreliable machines
K. Sörensen and G.K. Janssens 163

Manufacturing cells design with flexible routing capability in presence of unreliable machines
M. Diallo, H. Pierreval and A. Quilliot 175

Spare provisioning strategy for preventively replaced systems subjected to random failure
A. Chelbi and D. Aït-Kadi 183

Economic design of a Vp $\bar{X}$ chart
M.S. De Magalhães, E.K. Epprecht and A.F.B. Costa 191

Production Management Strategies
The role of qualitative methods in production management research
R. Beach, A.P. Muhlemann, D.H.R. Price, A. Paterson and J.A. Sharp 201

Manufacturing flexibility and real options: A review
J. Bengtsson 213

Virtual enterprise – organisation, evolution and control
M.T. Martinez, P. Fouletier, K.H. Park and J. Favrel 225

A network approach to operate agile manufacturing systems
J.-M. Frayret, S. D'Amours, B. Montreuil and L. Cloutier 239

Economic due-date setting in job-shops based on routing and workload dependent flow time distribution functions
H.P.G. van Ooijen and J.W.M. Bertrand 261

Modelling and Optimisation
Optimal moves of the material handling system in a robotic cell
N. Brauner and G. Finke 269

Automatic notation of the physical structure of a flexible manufacturing system
C. Tacquard and P. Martineau 279

Pattern generating procedure for the cutting stock problem
S.M.A. Suliman 293

The self-consistent parametric inference algorithm (SPI): Optimisation in continuous search space
B.E.J. Bodmann and A.T. Gómez 303

Diary of Events 313
